

TOP SHELF

Audisee , Bengaluru

AV lovers have another reason to rejoice, thanks to sense gratifying demo rooms from Audisee

Where is it?

If you're an AV lover looking to get a new setup done, there are not many showrooms in India that offer the technical expertise like Audisee. Currently they have two showrooms. One in Bengaluru and the other in Coimbatore that should make any AV hog drool on brands like Focal from France, Wolf Cinema and AudioControl from the United States.

Who is it for ?

The showroom is meant to cater to a wide range of AV needs, be it personal audio, compact wireless, two-channel or AV, multimedia, car audio, monitoring and pro studio, custom and public address systems. You could point out that most high-end showrooms would stock world renowned brands. But what sets Audisee apart is its immense technical knowledge. The tech team at Audisee is one of India's most qualified. They have received training from the world's most recognized bodies in the audio & video industry like THX, ISF (Imaging Science

Foundation) and HAA (Home Acoustics Alliance) certified professional. This combination of product and technical know-how enables Audisee to create state of the art entertainment systems for all types of residential projects.

What if i have a smallish house?

More often than not, the size and shape of the room you intend to get your AV setup in, might not be conducive to the perfect AV experience. Here is where Audisee comes to the rescue. They offer simple to advanced acoustic solutions,

even for smaller sized rooms, including sound proofing and customised sound control as per the given space along with audio video calibrations to THX, ISF and HAA standards. Audisee offers free local in-home consultation to get your basic price conscious or high-end rig going. So if you happen to be in Bengaluru or Coimbatore you should head to one of the Audisee showroom to sink yourself into the multiple demo rooms to give a listen to some of the best systems in the AV world before you put your money on the table.
